After playing the FREE trial with 5 games. All i can say is.....

Not enough players or content.

Price is to high for unfinished game.

Game needs better animations for humans and monster.

Scary? U might get some jump scares here and there but nothing to get your pants brown for. So spooky not so much...

Wel heck is there anything good at all then after giving it a thumbs up you say?

Wel the game is playable and does not contain a lot of bugs so far i have played.

The idea is good and has potential. But they need to step it up now and get animations fixed and the gameplay style a revamp. And also please do not stick to just one way to big map! even if its going to be super random in setup in the future... i mean just trees and some houses is not going to last for very long. Need more maps! Now i thumbed this game up because the devs really do care and keep updating and working with fanbase. They just need more time and funds to get this where it needs to be. And we could perhaps get something epic in the spooky department.

But then again...early acces allways is a tricky thing for both partys. Is it worth buying atm? NO. But if you can play the free trial like me or get it below 10 bucks i would say go for it and give your experience the perhaps help the game out if your into these types of games.. Played a few matches and it was fun. I will probably keep it on hold for now until multiplayer comes out, because playing against AI doesn't feel rewarding. It is definitely a game I could get into once there are more features though.. Unable to connect with steam server for 2 weeks..Asked for refund..Refused. Great classic Kent commuter train. Sounds however are atrocious, but Armstrong powerhouse fix that along with adding a free class 466, NSE and Connex reskins. Worth every cent if you buy the AP soundpack for it.

8-9V10 (with AP sounds and liveries) otherwise 5-6V10 (yes, it makes that much of a difference. probably the most worth sound pack.. Thought provoking, I'll give it that. If you've got a spare 45 minutes, play it and laugh. i meet recommended system requirements and its so laggy i cant play it so i want a refund. Pretty good background music, goes great with being a benedictine. worst game ever. 10/10 would play again. -ign. gameplay is really bad. Only buy it on sale if you want the achievements.. nice game !

Should be more like a buck, but it's fun. This game is charming and has potential, but it's totally flawed in that A) It's pretty hard to control with just arrow keys, which is the whole point of the game (moving the ball around the course), and B) After you fall and respawn, all of your momentum is conserved from before you fell. So if you were rolling up, for example, and then fell off the course, you will respawn still rolling up. I just need it to kill all momentum when I respawn for minimal cancer.

EDIT: It has been brought to my attention that my second point was fixed. You will no longer retain momentum after respawning from a fall.. I took one for the team so Disgaea D2, 3,4, and 5 might see the light of day here on steam.

I guess it would have been a tolerable game if they fix the face buttons in game. They show generic controller face buttons while tutorial refers to 360 controller buttons. I am going back to Disgaea 5 on switch til this is fixed.

Update: I plan on keeping the game and giving them the benefit of a doubt. Somewhere in here must be a good and complex game that NISA usually dishes out. Not the same level of polish as Disgaea series. It is tricky to review NISA games since most of the time the story isn't their focus but the overall mechanics and the addictive grindfest presented in the random and postgame contents of their game.

The negative review is only because for the price they are asking it really feels like a sloppy port. Heck cladun X2's text entry was better despite unwieldy since it merges well with the game whereas text entry here is a windows box that prompts you to type on your keyboard and cancel it. It is going to be forgivable if the game charges less money but since it is a \$40 game then I will evaluate it as such. I have seen indie games release their games for half the price and more polish than this game and to think this is also simultaneously released for PS4 and Vita.

I support NISA's effort to release games on steam and wholeheartedly support it since most of their games are stuck on Sony and Nintendo consoles and I would love PC players to also see the great games NIS has especially the Disgaea series. I can't recommend the game at its current state because of my complaints plus it is a niche title that has a hefty price tag.. This game is amazing! It is easy to tell a lot of effort went in to it. The puzzles are challenging in the sense that it made my mindset shift perspective to solve them sometimes. I think that's pretty freaking cool. I also like the atmosphere the music created. It kept me on my toes. If you are on the fence about whether or not to get this game, I say get it. It is worth it. It's not expensive and due to all the different endings you can get hours upon hours of gameplay out of it. This, however, is only my opinion.. This game is♥♥♥♥♥♥
